

**MERCER CONTROLS, INC.**

## Thinking about replacing motors?

Most motors manufactured  
after December 19, 2010  
must perform at higher electrical efficiencies.

THE PRICES OF MOTORS BUILT AFTER THAT  
DATE WILL BE MUCH MORE EXPENSIVE. The  
price of a 100-horsepower motor is expected  
to TRIPLE.

The energy saved with the new design motors  
will normally require 5 years or more of  
operation to return the difference in cost, if the  
motors are used only 50% of the time.

**YOU MAY FIND IT ADVANTAGEOUS  
TO CHANGE MOTORS NOW,  
BEFORE THE LARGE PRICE INCREASES.**

**Call us for  
motor  
replacement  
quotations.**
